OBJECTIVE

I am eager to transition my skills to Supervised Machine Learning

SKILLS

As a Full Stack Web Developer and Data Analyst, I have understanding of JavaScript and Python. database management, MERN Stack, Serverless and Django Stack. My expertise also extends to front-end frameworks and libraries such React, Express Handlebars, Bootstrap, Chakra UI, and HTML5.

EXPERIENCE

Freelance Web Developer | Data Analyst (TELUS International)

As a freelance Full Stack Web Developer, I have completed more than 35 projects, ranging from small to medium sized applications. These projects have allowed me to leverage a wide array of technologies and framework, including:

- Front-end development using React.js, employing Chakra UI components, tailwind and Bootstrap.
- Backend implementation with Node.js, Express, Flask and Django and utilizing Express Handlebars and Jinja2 for server-side templating.
- Database management, utilizing MongoDB and MySQL for efficient NoSQL and SQL data storage needs, Amazon S3, and DynamoDB for cloud storage solutions, PostgreSQL for robust relational database management, and Cloudinary for images storage
- Proficient with version control, Git and collaborative Projects.
- As Data Analyst for TELUS International, I have contributed to improvement of Search Engines by rating and correcting various returned results from users search and mapping queries.
- Applied Python and JavaScript knowledge to develop tool to parse Data from PDF file (Bank Statement) and automate Business Activity Statement.

EDUCATION

FULL STACK WEB DEVELOPMENT (CODING BOOTCAMP)
Monash University
https://www.credly.com/badges/cec1de68-27a2-408d-b4e2-a01e7e2132ae

DIPLOMA OF BUILDING AND CONSTRUCTION
OTEN institute (NSW)

BACHELOR OF ARTS (PSYCHOLOGY)
Deakin University (Burwood Victoria)
